Forecast For Northwest England
Issued by Met Office Exeter
at 0400 on Sunday 21 Feb 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Dry and bright at first but with patchy rain later.

Today:
It will be a dry morning across the region with a bright start further north. Cloud will increase from the south through the afternoon and bring with it some intermittent rain later. Light winds, feeling mild. Maximum temperature 12 deg C (54 deg F).

Tonight:
Cloudy throughout this evening and tonight. Mostly light rain will fall through the evening but turning drier later. Feeling mild with light winds and a chance of fog developing overnight. Minimum temperature 5 deg C (41 deg F).

Monday:
A dry day with any lingering rain from the previous night soon clearing. Cloudy for most before becoming much brighter during the afternoon. Winds remaining light and staying mild too. Maximum temperature 10 deg C (50 deg F).

Outlook for Tuesday to Thursday:
Turning wet and windy from Tuesday, especially in the north of the region. More of the same on Wednesday, before becoming showery with calmer winds on Thursday. Mild throughout.
